

Steel Saws and Saw Blades

STEEL SAWS

Our saws are quicker, safer, more accurate and economical than competitive models or abrasive saws. Cut mild steel without excessive heat, sparks, burrs or the necessity of coolant.

7-1/4" Steel Circular Saw

The 7-1/4" saw, for plate, tube or angle, offers a 0- 45° bevel and adjustable depth of cut to out-perform angle grinders.

9" Steel Circular Saw

The 9" saw, ideal for plate, pipe or metal roofing, features a laser guide, bevel feature and adjustable depth of cut.

15" Steel Circular Saw

The 15" chop saw cuts cleanly, without excessive heat, burrs or coolant, features a 45° fast action swivel clamp, and outlasts abrasive discs.

Saw Blade included with each steel saw.

SAW BLADES

Our standard saw blades are the finest steel cutting blades on the market.

Our saw blades are designed to deliver maximum performance by using the highest grade carbide, hardened blade bodies and ultra high grade brazing techniques.

Specialty saw blades include

- thin steel
- stainless
- aluminum
- diamond
- wood
- masonry
- multi-purpose

Saw blades are available for almost any industrial saw manufacturer, including:

Evolution, Milwaukee, Jancy, Bosch, MK Morse, Steelmax, Dewalt, Makita

Our Mild Steel Saw Blades can cut through 6" of 1/4" mild steel in as little as 12 seconds. Carbide Steel Blades are faster, cooler, more accurate and longer lasting than abrasives.
